ANKIT ARORA

Vice President, Software Engineering Manager - JPMorgan Chase

Summary

Software Engineering Manager with 15 years of experience building and scaling secure banking, financial systems, and enterprise digital platforms. Proven expertise in leading senior and lead engineers to deliver mission-critical, regulated systems with high reliability and compliance. Specialized in platformization and component library digitization, enabling reusable ecosystems, and scaling micro frontend host architecture for large-scale mission systems. Strong background across backend and frontend development, with deep expertise in cloud-native architectures, microservices, and distributed system design.

Experienced in AI enablement, integrating AI-driven automation and agentic AI solutions across CI/CD, quality governance, and operational workflows to improve productivity and system intelligence. Successfully delivered 9+ large-scale enterprise applications to production, scaling to millions of users with full ownership of architecture, reliability, compliance, and ongoing production maintenance.

EDUCATION
